

WW II

Flight Sergeant Leonard Sumpter was a bomb aimer during the 1943 Dambusters raid attacking the Eder Dam

He described the night as a 'satisfactory attack' on the Eder Dam at an average height of 100 feet

On D-Day Sumpter flew a secret mission dropping 'Window' over Northern France to confuse German radar

He was also involved on attacks on U-Boat Pens, viaducts and even strikes against V-rocket sites

The previously-unseen logbook kept by a Dambusters hero which documents the famous wartime raid has sold for nearly £9,000. Flight Sergeant Leonard Sumpter was a bomb aimer on the mission to destroy a series of German dams using Barnes Wallis' ingenious 'bouncing bomb'.

His logbook, that has been owned by his family, dates from October 1941 to September 1945 and charts Operation Chastise - the official name for the Dams raid on May 16, 1943.

This is the logbook entry for Flight Sergeant Leonard Sumpter's recollection of the Dambusters raid where he states quite dryly: 'Op No 14. Via Holland to the Hun. Satisfactory attack on Eder Dam 18 miles west of Kassel. Average ht 100 feet .

According to his record, the mission took six and a half hours to complete. What the log book fails to mention is the fact the crew of Sumpter's aircraft took seven attempts before releasing their bomb to ensure it struck its target

+26

On June 5, 1944 at 23.15, under the command of Squadron Leader David Shannon, Sumpter was involved in a 'special duty' on a mission which launched before the attack on June 6 in a flight which lasted four hours and 35 minutes. He was tasked with dropping 'Window' - small pieces of aluminium - designed to confuse enemy radar.

On June 8, he and the squadron leader had switched to the two-seat Mosquito - aborting one mission due to an engine problem, but later attacking U-boat Pens, a Watten 'P' Plane nest and a 'good raid on a rocket installation

Instructions

1. This log book is an official document and the property of H.M. Government.
2. Observers and air gunners will maintain an accurate and detailed record of all flights undertaken on service aircraft.
3. Proficiency assessments will be recorded on the appropriate page at the back of the book annually on 31st December, on posting or on attachment to another unit for flying duties.
4. Bombing and Air Gunnery records will be entered in the appropriate pages at the back of the book annually on 31st December.
5. Monthly totals will be entered on a single line in red ink and initialed by the Commanding Officer or his deputy.

Leonard Sumpter from Luton, Bedfordshire trained to be a bomb aimer on the Lancaster Bomber in Ontario, Canada

+26

Here Flt Sgt Sumpter has photographed a fellow Lancaster crew releasing a 10-tonne Grand Slam bomb over a target

His entry for the May 16, 1943, lists the seven crewmen on his plane which took off from RAF Scampton at 9.50pm. He stated: 'Op. No. 14 via Holland to the Hun. Satisfactory attack on Eder Dam 18 miles west of Kassel. Average ht. 100 feet.'

The incredibly risky mission involved 19 Lancaster bombers flying a low-level to avoid radar.

FL SGT SUMPTER'S LANCASTER, CALL SIGN AG-L HIT THEIR TARGET BUT THEIR BOMB FAILED TO BREACH THE WALL.

Theirs was one of 11 bombers that made it back to Britain after the attack, with eight others shot down resulting in the loss of 53 of the 133 men involved.

During 1944 Sumpter was flying missions in both Lancaster bombers and the De Havilland Mosquito

+26

•

The logbook was sold for £9,000 at auction, while a Flt Sgt Sumpter's scrapbook raised a further £3,850

The log also lists 617 Squadron's last sortie of the war in April 1945 - an attack on Berchtesgaden, Adolf Hitler's 'Eagles' Nest' in the Bavarian Alps, with a 12,000lbs Tallboy bomb.

It was sold at auction for a hammer price of £7,000 but with fees added on the total price paid was £8,890.

Also sold was a unique scrapbook kept by Ft Sgt Sumpter which contained never-before-seen images of the men of 617 Squadron. The snaps include Guy Gibson's Lancaster on the runway with the bouncing bomb loaded underneath before taking off for the Dams raid, for which he won the Victoria Cross.

+26

He also had a scrap book with details on the missions Flt Sgt Sumpter completed with his crew during his wartime service

Squadron last operation of war

THURSDAY, APRIL 26, 1945

Berchtesgaden hit by 12,000lb bombs

HITLER'S hideout at Berchtesgaden, now the capital of the South German Redoubt, was shattered yesterday by R.A.F. Lancasters in the war's most dramatic pin-point raid. Photographs show large numbers of bombs, specially fused for deep penetration, bursting right on the Führer's chalet.

Other Lancasters attacked his "Eagle's Nest" mountain refuge five miles away—a target only 17 yards square—and the S.S. barracks in the chalet grounds.

A total of 350 bombers went to Berchtesgaden. There is strong probability that Hitler was there, despite German claims that he is leading the defence of Berlin.

According to the Mayor of Gotha, captured by American troops, the German High Command moved in on March 31, and it is certain that there are many high Nazis in the area.

Crews bombing the Eagle's Nest had the most difficult job. It was in many ways the trickiest precision attack of the whole war. The roof of this eyrie, perched on top of the 5,000ft. Kehlstein is only 17 yards square, yet it covers practically the whole of the mountain top. No heavy bomber has ever had a smaller target.

© IAA/BNPS

+26

As well as photographs from the missions, Flt Sgt Sumpter kept press clippings of their exploits in his scrap book, including his final mission - which was an effort to take out senior Nazis at Hitler's Eagle Nest refuge in Berchtesgaden

+26

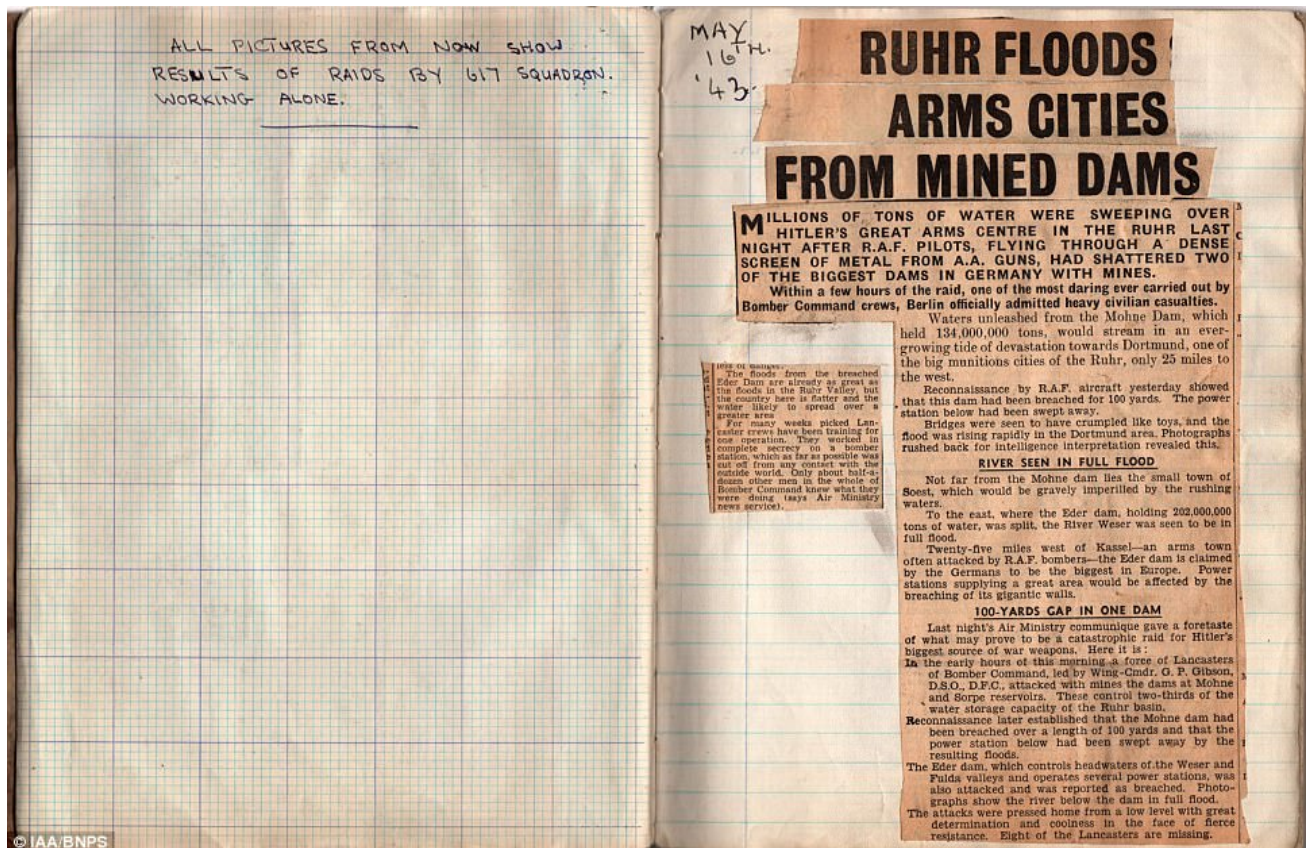

-

Also included in Flt Sumpter's scrap book is a photograph of the very aircraft he was in during the daring Dambuster's raid. There are also aerial images showing other huge bombs dropped by Flt Sgt Sumpter towards enemy targets during his wartime career.

Two years after the war he did a tour of some of the sites he had bombed in France and Germany and his photos show the wrecked Mohne dam and a viaduct.

The scrapbook sold for a total of £3,850.

Richard Davie, of Nottingham-based International Autograph Auctions which sold the archive, said: 'The log book gives us an insight into what Bomber Command were concentrating on during the Second World War.'

+26

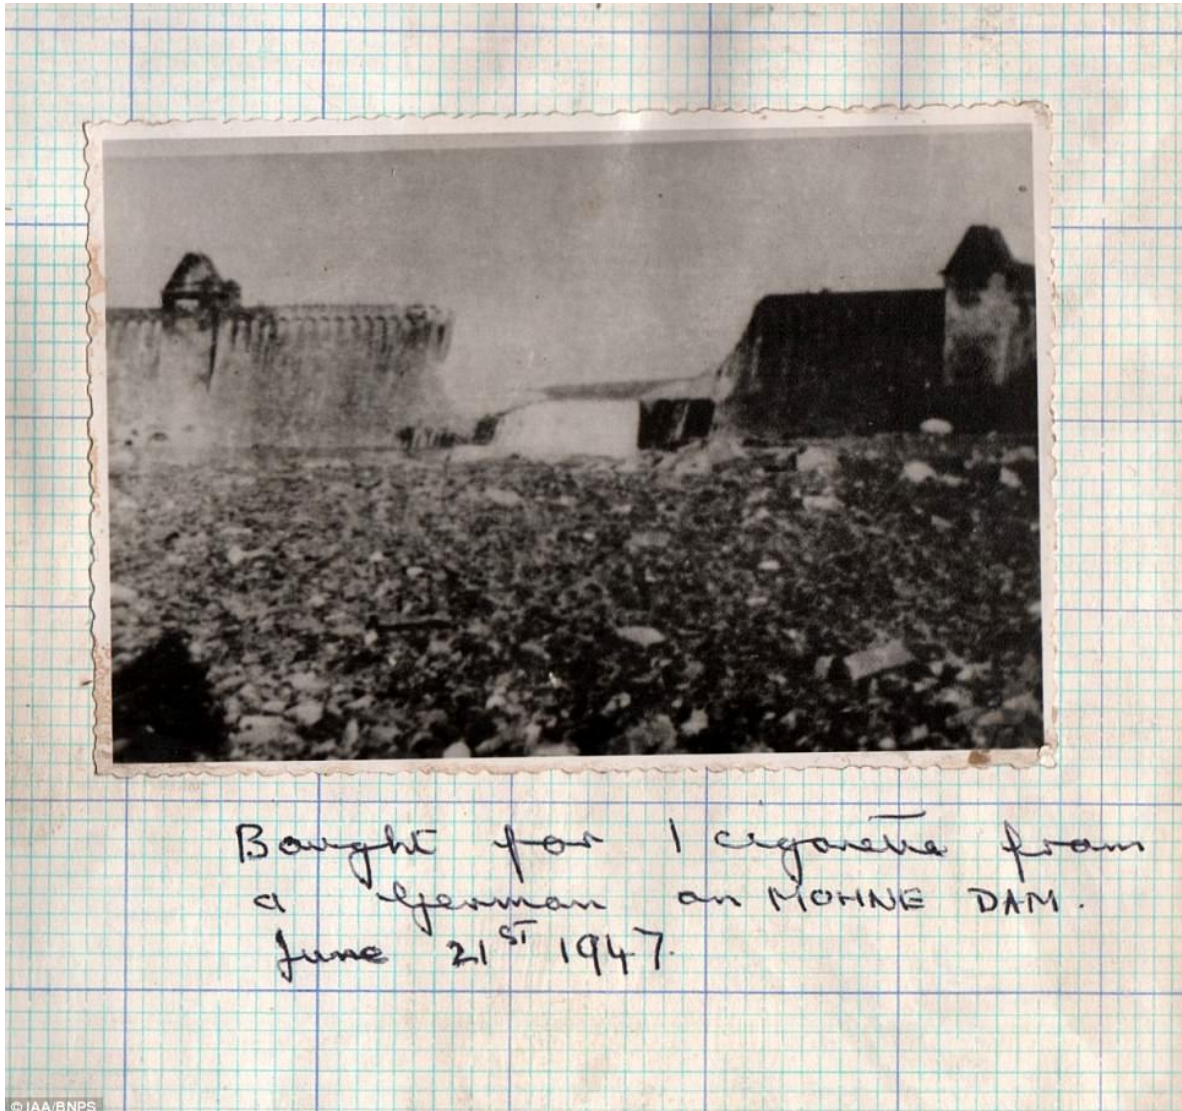

Days after the Dambusters raid, some of the details - including the loss of eight aircraft - were revealed to the public

+26

•

Sumpter's scrap book contained photographs of the damage caused by his squadron on the night of the infamous raid

+26

•

Sumpter visited the Mohne dam in 1947 and said he bought this photograph from a German of the damage for one cigarette

'The highlight was the Dambusters raid which was one of the most famous operations of the war.

'The logbook is an extremely rare and historically important.

'While the logbook is an official record Flt Sgt Sumpter had to comply with and fill in all the details, this scrapbook is a much more personal record of the war through his eyes and includes press cuttings with written comments besides them.'

Flt Sgt Sumpter, from Luton, Bedfordshire had served in the Grenadier Guards before transferring to the RAF in 1941. After he was assigned to 617 Squadron, which was set up specifically for the Dams raid, he took part in numerous low-level night-time training exercises over the English countryside, according to his log.

The following year he was awarded a Distinguished Flying Cross for his service in marking bombing targets while flying in Mosquito planes.

By the end of the war he had flown 35 operations. He died in 1993.
